

Place Title Here

Author A^{*}, Author B[†], Author C[‡]

Article Type:

Opinion, Primer, Overview, Advanced Review, Focus Article, or Software Focus

Abstract

The abstract should not exceed 250 words and should be a concise description of the article and its implications. It should include all keywords associated with your article, as keywords increase its discoverability. Please do not include phrases such as “This article discusses ...” or “Here we review ...”, references to other articles, or URLs.

^{*}Department of Biology, University 1, ...

[†]Department of Chemistry, University 2, ...

[‡]Department of Physics, University 3, ...

GRAPHICAL TABLE OF CONTENTS

Include an attractive full color image for the online Table of Contents. It may be a figure or panel from the article, or may be specifically designed as a visual summary. You will need to upload this as a separate file during submission.

Size: The maximum width and height are 390 pixels, and the minimum resolution is 300 dpi. Multi-panel graphs or images are strongly discouraged.

Caption: This is a narrative sentence to convey the article's essence and wider implications to a non-specialist audience. The maximum length is 50 words, but consider using 140 characters or less to facilitate social media sharing, which can increase the discoverability of your article.

INTRODUCTION

Introduce your topic in around 2 paragraphs, around 750 words. Please define all acronyms at their first usage except IR, UV, NMR, DNA or similar commonly understood terms. References should use the [APA style](#), like this (?, ?).

First-order heading

Second-order heading

Third-order heading

Main text paragraphs should be 12 point font, double-spaced, with a maximum of 3 levels of headings (style as shown).

Try to create headings that:

1. help the reader find information quickly;
2. are descriptive yet specific;
3. are compatible in phrasing and style; and

4. are concise (less than 50 characters).

Remember that you are writing for an interdisciplinary audience. Please be sure to discuss interdisciplinary themes, issues, debates, etc. where appropriate. Note that the WIREs are forums for review articles, rather than primary literature describing the results of original research. Reviews should comprehensively survey recent progress in a topic of broad interest, providing the readership with an appreciation of the importance of the work, a summary of recent developments, and a guide to the relevant literature.

EQUATIONS

Equations should be inserted using standard L^AT_EX equation and eqnarray environments, not as graphics, and should be set in the main text.

$$\exp(\pi i) = -1 \tag{1}$$

FIGURES AND TABLES

Please embed figures and captions in the correct places in the text to facilitate peer review. The [H] next to the figure tag approximately anchors the image to the spot you decide. Production quality figure files are still to be submitted separately. Please note that you will be required to copy the figure captions into the ScholarOne Manuscripts online submission system when uploading your figure files.

Figure captions should stand alone and be informative outside of the context of the article. This will help educators who may want to use a PowerPoint slide of your figure.

Make sure to include credit lines for any previously published materials. Permission to reuse or adapt previously published materials must be submitted before article acceptance. See [here](#) for more information. See [here](#) for instructions on figure preparation and formatting.

Please include tables in-line in the text by moving the table code to the appropriate place in the text. The [H] approximately anchors the table to the spot you decide.

Quantity	Calculated	Observed	Error
Label 1	n1.1	n1.2	Below limit
Label 2	n2.1	n2.2	Above Limit

Table 1: Place table caption here.

SIDEBAR

You are encouraged to include up to two sidebars (boxed information that is relevant to but separate from the main text), especially to highlight interdisciplinary themes. Each sidebar should be a maximum of 250 words.

NOTES

Authors writing from a humanities or social sciences perspective may employ notes as necessary, and only if a comment or additional information is needed to expand on a citation. Notes only containing citations should be converted to references, instead. (Conversely, any references containing comments, such as For an excellent summary of, should be converted to notes.) Notes should be indicated by superscript letters, both in the text and in the notes list. Citations within notes should be listed in the reference section and numbered in order.

ACKNOWLEDGEMENTS

List contributions from individuals who do not meet the criteria for authorship (for example, to recognize contributions from people who provided technical help, collation of data, writing assistance, acquisition of funding, or a department chairperson who provided general support), with permission from the individual. Financial and material support should also be mentioned. Thanks to anonymous reviewers are not appropriate.

CONCLUSIONS

Sum up the key conclusions of your review, highlighting the most promising scientific developments, directions for future research, applications, etc. The conclusion should be around 2 paragraphs, around 750 words total.

REFERENCE STYLE

Please use the [APA style](#) for formatting references. We have included some references below as an example.

FURTHER READING

For readers who may want more information on concepts in your article, provide full references and/or links to additional recommended resources (books, articles, websites, videos, datasets, etc.) that are not included in the reference section. Please do not include links to non-academic sites, such as Wikipedia, or to impermanent websites.
